## OUR HISTORY

Established in 1981 in Riyadh, Nardeen brings the most knowledgeable people in the lighting Industry together, with products and resources to satisfy all your lighting needs. At present, Nardeen is one of the leading manufacturers of fluorescent lighting systems in the region.

Nardeen's team of skilled lighting technicians and exceptional customer service support personnel, brings creativity, quality and professionalism to the client. The company's philosophy is based on its commitment to innovation, which has led to significant strands in the industry's technological advancement in the region. Nardeen unique offered service is " The ability to design, supply and maintain creative lighting systems for projects of any size."

Working with the finest and most renowned international lighting manufacturers, the company has continuous access to highest technical resources available in the industry.

Nardeen has positioned itself as a leading supplier of professional Interior and Exterior lighting, and has always been a reliable partner in a vast spectrum of applications in innovative lighting solutions.

“ As an “ ISO 9001:2000” accredited company, Nardeen maintains branch offices in jeddah and Al-Khobar, with an outstanding network of dealers and independant skilled sales distributors, throughout the kingdom of Saudi Arabia and across the GCC countries. ”

# Leading The Way

// You will also find that when you visit our manufacturing facilities, Saudi personnel hold positions in every department as part of Nardeen's strive to increase workforce by providing the finest training so that they may become multi-skilled professionals in future. //

## Human Resources

Our people, with their impeccable lighting and engineering experience and their knowledge in product innovation, is one of the most distinctive marks of Nardeen's identity. We are particularly proud of our team of skilled manufacturing technicians and key personnel who have been with us for over 15 years. Their knowledge of the industry, coupled with our ISO 9001:2000 standards, ensures a zero defect policy which has allowed Nardeen to gain a reputation as a cost effective leader in the field. The company also maintains a periodic policy of sending its specialized technical and engineering staff on annual trips to international exhibitions all over the world, in order to maintain its knowledge of the latest developments in modern light engineering techniques.

Nardeen endorses quality as a motto; therefore our organization operates under Total Quality Management system complying with the ISO. Our factory is outfitted with state of the art machinery and best facilities. Our skilled and qualified team ensures the production of our light fittings that are subject to strict quality control scrutiny. We acquire our raw material and components from reliable, ISO approved suppliers around the world. Our Lighting products, which are UL Listed, meet the international standards mainly by strict SASO regulations.

“ The strength of the team is each individual member. The strength of each member is the team. ”

## OUR TEAM

// Has been twice awarded, in 1986 and 1998, The King Abdulaziz Award for Ideal factory in Industrial Safety by Ministry of Industry and Electricity //

At Nardeen, providing the customers with optimized service is a principal. Our services start from a good understanding to our customers requirements, till the delivery of the best lighting solution and products.

Our goal is our customer satisfaction in every detail, giving the utmost attention and care from designing, specifying and identifying the appropriate solutions and applications. Therefore, continuous products and services development are our commitment to maintain our customers trust.

# Elevating The Standards

// In 1987, Nardeen established a state of the art manufacturing plant to produce fluorescent lighting units for use in the commercial, institutional and retail industry. //

## Manufacturing

This process starts with close coordination with clients, architects, engineers and lighting designers to provide innovative lighting solutions for a variety of applications.

Our 25,000 square meters manufacturing facility is located in the Second Industrial City in Riyadh, Saudi Arabia.

Our ISO 9001:2000 certified manufacturing facility is always ready to bring new and exciting products to the market. Teaming with Nardeen can be the first step to a one-stop solutions for a project's total lighting requirements. Nardeen also has one of the most sophisticated lighting laboratories in the Middle- East.

Our technical abilities include world-class goniophotometric efficiency by exploiting state of the art light sources and reflectors technology.

# Utilising Technology

## Distribution and Export

The distribution and development of our products are based on the highest ISO standards with world class distribution facilities that are capable of reacting swiftly to meet your immediate requirements.

Whether our products are intended for export or for a project in the kingdom, Our state of the art communication network and requisition system is able to process your requests and orders as flexibly as possible.

If it is only one fixture you need, or thousands, you will always find that we produce a high quality product that is creatively designed, intelligently adaptable and affordably priced.

Nardeen lighting's commitment to its customers through its quality products, on-time delivery and technical support sets it ahead of the competition, into the future.

Nardeen's list of clients include the prominent contractors, end users and experienced wholesalers in the kingdom.

// Nardeen's distribution network covers the whole territory of Saudi Arabia, the Arab countries and the GCC.

Nardeen is keen to develop new potential markets. //
